## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

1. The indicated allowability of claims 12-18, 22-24 is withdrawn in view of the newly discovered reference(s) to Watanabe, U. S. Patent No. Rejections based on the newly cited reference(s) follow.

### *Claim Objections*

2. Claim 5 is objected to because of the following informalities: claim 5 is dependent upon cancelled claim (cancelled claim 4). Appropriate correction is required.

3. Claim 18 is objected to because of the following informalities: line 3, recites "the motor vehicle sound system". There is insufficient antecedent basis. Appropriate correction is required.

4. Claim 25 is objected to because of the following informalities: line 4, recites "the scope". There is insufficient antecedent basis. Appropriate correction is required.

### *Claim Rejections - 35 USC § 112*

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. **Claims 12-17** are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding independent claim 12, line 8, recites “the first sound generating input”. It is unclear as whether the 1<sup>st</sup> sound system input unit and the multimedia data generating units is one in the same. Thus the claim language makes this limitation indefinite.

Regarding claim 13-17, they are dependent upon claim 12.

***Claim Rejections - 35 USC § 102***

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

8. **Claims 18 and 22-25** are rejected under 35 U.S.C. 102(e) as being anticipated by Watanabe, U. S. Patent No. 60310241.

Regarding **claims 18, 22-23 and 25**, Watanabe discloses a transmission right assigning method and communication system. Watanabe’s disclosure comprises a plurality of devices (1-1...1-n) with priority values, wherein the devices interact between each other based upon their respective priority levels via an interface, which reads on a first and second input unit that receives a 1<sup>st</sup> priority value indicative of a 1<sup>st</sup> scope of authority and a 2<sup>nd</sup> priority value indicative of a 2<sup>nd</sup> scope of authority, respectively, a transmission line (3) communication line, which reads on a system bus; a network system including a DVD system, CD system, a portable telephone, car speed sensor, navigation system, and audio speaker, etc. coupled to this communication line, all of which are functional based upon its priority number are controlled by

the transmission right assigning unit (col. 5, lines 25-54, col. 9, lines 62-67, col. 10, lines 1-22, col. 12, lines 57-64 and figure 1), wherein it inherent that this system in used in a vehicle as evident by the that a car sensor is a part of the network components.

Regarding claim 20, Watanabe discloses everything claimed as applied above (see claim 18). Watanabe discloses the transmission right assigning unit which reads automatically providing a 1<sup>st</sup> and 2<sup>nd</sup> priority value.

Regarding claim 24, Watanabe discloses everything claimed as applied above (see claim 22). Watanabe discloses each device having a memory (col. 5, lines 40-49)for storing the transmittal data, which reads priority values and functional scope data

#### ***Allowable Subject Matter***

9. Claims 1-3, 7-8, 10, are allowed.

10. Claims 19-21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Response to Arguments***

11. The applicant did not provide any arguments. The remarks only addressed the 112 amended changes and the amended changes claim objections previously cited.
